Note - tax status of individual investors

Please note that the relevance of each row depends on the specific tax status of the individual. Tax advice should be sought to the extent that there is any doubt.

Note - units that are held throughout the period

Investors should take the amounts detailed in columns 2 to 5 and multiply by the weighted average number of units held throughout the relevant period to arrive at the total amount of income / expense (split according to source and fiscal year).

Note - units bought and sold during the period

If you are an investor that has left or joined during the period you will need to take the numbers in column 2 to 5 and then carry out a further adjustment to time apportion the amount of income. Once you have multiplied the amount / unit by your holding, this amount will then need to be time apportioned for your specific

For example, if you bought 1,000 units at the end of December 2022 and hold them at the end of September 2023 you will need to take time apportion the numbers in column 2 to 5. If dividends is assumed to be EUR 0.1100 per unit, for the period to 5th April, your share is EUR 0.1100 * 1000 = EUR 110. When time apportioned, this becomes EUR 110 * 96 days / 187 days = EUR 56.47. If dividends is assumed to be EUR 0.050 per unit, for the period post 5th April, your share is EUR 0.0500 * 1000 = EUR 50, no time apportionment is required as you were in the fund for the whole of that period. Therefore your total entitlement is EUR 106.47.

For example, if you sold 500 units at the end of April 2023 that you held since the beginning of that period, you will need to time apportion your share of dividends for both periods i.e. taking numbers from column 2 to 5. If dividends is assumed to be EUR 0.2000 per unit, for the period up to 5th April, your share is EUR 0.2000 * 500 = EUR 100, no time apportionment is required as you were in the fund since the beginning of that period. If income is assumed to be EUR 0.1500 per unit, for the period post 6th April your share is EUR 0.1500 * 500 = EUR 75. When time apportioned, this becomes EUR 75 * 25 days / 178 days = EUR 10.53. Therefore your total entitlement is EUR 110.53.

Note - tax status of corporate investors

Please note that the relevance of each row depends on the specific tax status of the corporate. Tax advice should be sought to the extent that there is any doubt.

Note - units that are held throughout the period

Investors should take the amounts detailed in column 2/3 and multiply by the weighted average number of units held throughout the period to arrive at the total amount of income (split according to source).

Note - units bought and sold during the period

If you are an investor that has left or joined during the period you will need to take the numbers in column 2/3 and then carry out a further adjustment to time apportion the amount of income. Once you have multiplied the amount / unit by your holding, this amount will then need to be time apportioned for your specific holding period.

For example, if you bought 1,000 units at the start of December 2022 and hold them at the end of September 2023 you will need to time apportion your share of dividends (for example). If this is assumed to be EUR 0.1100 per unit, your share is EUR 0.1100 * 1,000 = EUR 110. When time apportioned, this becomes EUR 110 x 10 months / 12 months = EUR 91.67

For example, if you sold 500 units at the end of March 2023 that you held since the beginning of that period, you will need to time apportion your share of dividends (for example). If this is assumed to be EUR 0.1500 per unit, your share is EUR 0.1500 x 500 = EUR 75. When time apportioned, this becomes EUR 75 x 6 months / 12 months = EUR 37.50.
